

PATIENT INFORMATION

Full Name: BOUDIAF Rayan
Date of Birth: March 15, 2018 | Age: 7 years
Weight: 22 kg | Height: 110 cm | Physician: Dr. Karim AMRANI

PRESCRIBING PHYSICIAN

Dr. Karim AMRANI — Pediatrician, Pediatric Pulmonology
Oran Pediatric Hospital | Consultation no. C-2026-001 | March 10, 2026

PRESCRIBED MEDICATIONS

- AMOXICILLIN 500 mg/5 mL – Oral suspension (Clamoxyl)**
9 mL × 3 times daily for 7 days (80 mg/kg/day)
Take with food. Complete the full course even if feeling better.
- SALBUTAMOL 100 mcg (Ventolin) – Inhaler + AeroChamber spacer**
2 puffs when coughing or experiencing breathing difficulty. Max 4 times/day.
Shake before use. Spacer chamber REQUIRED for this age group.
- BUDESONIDE 200 mcg (Pulmicort) – Inhaler [maintenance]**
1 puff in the morning AND 1 puff in the evening — every day, do not stop.
Rinse mouth after each use. Do not discontinue without medical advice.
- PHYSIOMER Children – Isotonic nasal spray**
2 sprays per nostril, 3 times daily before meals and at bedtime.

Clinical Note:

Viral-bacterial bronchitis on atopic background. Review at Day 7 if no improvement.
Go to ER if: temperature > 39°C, SpO2 < 93%, or resting dyspnea.

Physician Signature & Stamp:

Valid for 3 months from March 10, 2026
